

A smarter vehicle logbook

Azets Expense offers an automated connection to a digital vehicle log of your choice - get going today.

With Azets Expense vehicle log add-on, your employees can stop counting the mileage themselves through distances and maps - the digital and automated vehicle logbook tracks any journey, from A to B to C and everything is reported daily to Azets Expense automatically.

Thanks to this connection to a currently used or future vehicle logbook, you'll no longer have to file complicated tax forms and your mileage in your vehicle logbook will be exact.

A vehicle log can sometimes provide headaches for administrators. Calculation errors are common and cause unnecessary administrative work. Azets Expense takes care of this administrative work while automatically reporting all journeys made on a daily basis.

Get there in three steps

Azets Expense takes care of the data reported by the vehicle log, daily.

• Track the miles

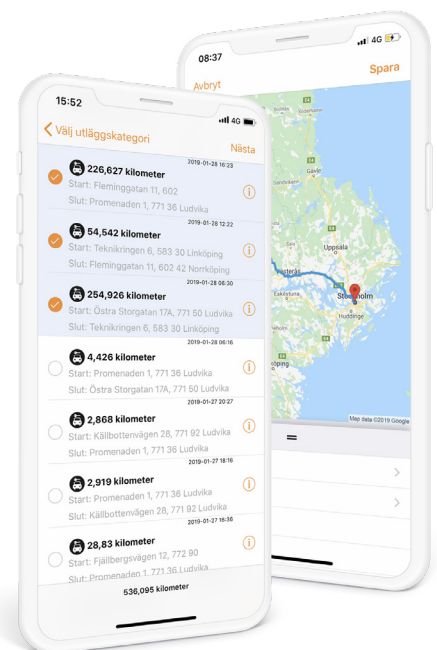

A GPS receiver in the car automatically detects when you start and end your trips.

• The driving data is transferred automatically

Via the electronic driving journal, the date, time and mileage are saved and then automatically transferred to Azets Expense daily.

• Reporting

In the app, you can easily choose which journeys you want to report on monthly, and then submit them to your financial or HR-department.

One app, one report and one attestation

With **Azets Expense** and an electronic driving log you can expect all expenses, travel bills, subsistence allowances and driving logs, to be reported to one place.

This service can be tailored to your particular needs, but all functions are available to make the driving journal a pleasure and not a torment.

How do I get started?

First you need to decide on which driving log you want to use - we offer a range of compatible driving log systems. Once you have selected your driving log, the supplier will provide you with a GPS receiver and transmitter.

This is installed in the car and you can now connect to **Azets Expense** and choose which trips you want to register. And with that, you're all set.

Interested?

You can read alot but asking someone who knows more is always helpful.

Visit azets.se/journal and provide your contact information - we'll be in touch as soon as possible.

Wide range of compatibility

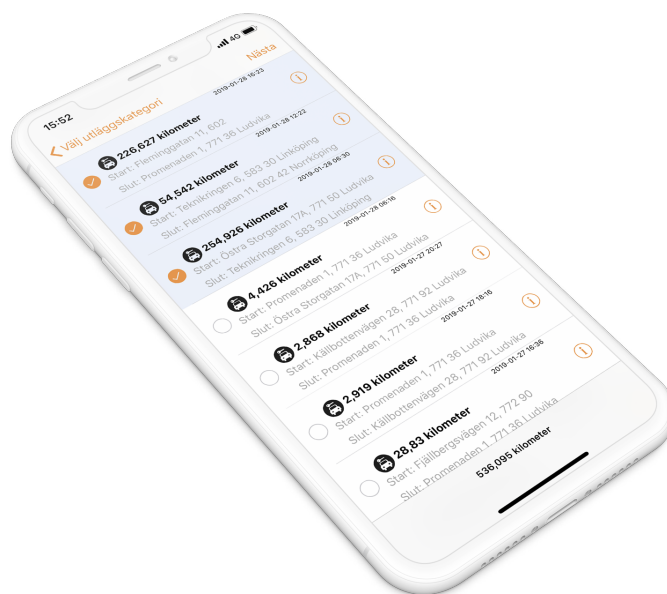

With support and connectivity to various car systems such as TelliQ, Automile, Telia Sense and Volvo On Call, your employees can relax and keep driving, knowing that every mile is automatically counted for.

TELIA SENSE

Automile
